## Students Organising for Sustainability Survey Results

This year we were very pleased to have seen our highest response rate when sharing the Students Organising for Sustainability Survey. This was a fantastic opportunity to work closely with the NUS and provided some key insights, we've highlighted a few here.

We'll be using these findings, paired with the primary research we've conducted within the Guild to shape our ongoing approaches to sustainability.

Through my time in education so far, I've learnt... What our daily lives What we can do at local What our iobs will What climate change Kev and global levels to will look like as a result look like as a result of is and how it happens lessen climate change of climate change climate change Strongly Agree Agree **Neither agree** nor disagree **Perspectives Perspectives from** How the ways in which I am taught and the content I from cultures around groups underrepresented learn has been influences by in our sciety Disagree Strongly Disagree Don't know
